Re: Docket #07-16 to provide fast, free, family-friendly wireless broadband internet access

Dear Secretary Dortch,

Using the internet is a large part of the day for many Americans. Many rely on the internet for communication through email and some simply for play. But for small businesses, and those who work from home, the internet can be the main source of information, news or sales. When a small business is not connected to the Internet, the business is limited in its effectiveness and efficiency.

As a small business owner, I know that a fast and reliable internet connection allows me to be as efficient and as organized as possible, whether keeping track of client files and payment information, or receiving news and updates. I believe the proposal put forth by M2Z Networks to make wireless broadband internet available at no cost will help small businesses everywhere. By saving on the cost of broadband, or even receiving access for the first time, a small business can better use the tools of the internet such as marketing and online sales opportunities.

I know that saving on broadband access will increase the bottom line for small businesses. I urge you to taking advantage of the M2Z Networks proposal and continue supporting and building America's small businesses.

Sincerely,

David Henry

Re: Docket #07-16

Dear Secretary Dortch,

I'm writing to you asking for support of the M2Z Networks proposal to provide free, fast and family-friendly broadband internet access to all Americans. Making broadband available in more homes, and making it affordable, is a positive move for everyone, and I support this.

To many students, families and teachers, working on-line at home is vital to their education and preparation for school. Yet only 42 percent of America's homes have broadband internet. With high-speed access, using the tools and resources available on-line would be easier and they could experience more of the internet's benefits.

Broadband access is important for the education of our children, and the teachers who need as many resources as possible to help them. I ask you to support this proposal and bring affordable broadband to homes across this country.

Regards,

Ruth Rowan
